LUXURY HOSPITALITY

PROCUREMENT DEPARTMENT

SEARCHING FOR INNOVATIVE SOLUTIONS

FOR LUXURY HOSPITALITY

Our HFC PROCUREMENT activity aims to find and select the best manufacturers of the most cutting-edge, innovative solutions, products and services, geared towards the customer experience and the comfort of your employees.

The current health crisis has shown the astonishing fragility of our social and economic model. For each of us, the challenge today is to put in place a reassuring marketing model, a global response intended to maintain the confidence of our customers who have all lived and continue to live a fairly anxyogenic period.

The implementation of more advanced hygiene solutions is now part of our daily life and will now be part of our life.

Here we offer a selection of the best European products and manufacturers of hydroalcoholic gel dispensing terminals to install in your hotels.

NEW GESTURES, NEW STANDARD

HYDROALCOHOLIC GEL DISPENSING TERMINALS

Hydro-alcoholic sanitizer dispensing terminals

100% French made, HYGY dispensers offer a very high level of finish and reliability.

HYGY includes a 2-year maintenance contract for all products.

To be installed on their wall support, placed on a counter or on a stand, these dispensers represent a high-end solution for the health security of your guests and your collaborators.

Hydro-alcoholic sanitizer dispensing terminals

PERSONALIZED "AT YOUR IMAGE"

White in their serial version, HYG Y terminals are partially or fully customizable: choice of RAL color (EPOXY paint) in mat or glossy finish // Sticking according to your logo or graphic charter // Covering: Leather, Wood, Carbon, Gloss, Marble, Gold leaves, ... // Laser cutting & LED back-lighting // LED strip // Total tailor-made project.

The HD screens of the iSafe and iSafe Mini are multimedia and can accommodate all formats of images, videos, .. Basically, the easiest way to stream content is to plug a USB key into the back of the monitor. The terminal will then broadcast, automatically and in a loop, the content (s) present on the key.

In the event of a fleet, the terminals can be controlled by a dynamic display solution (CMS) allowing remote management of the different content to be broadcast.
