PROCUREMENT DEPARTMENT

SEARCHING FOR INNOVATIVE SOLUTIONS

FOR LUXURY HOSPITALITY

Our HFC PROCUREMENT activity aims to find and select the best manufacturers of the most cutting-edge, innovative solutions, products and services, geared towards the customer experience and the comfort of your employees.

The current health crisis has shown the astonishing fragility of our social and economic model. For each of us, the challenge today is to put in place a reassuring marketing model, a global response intended to maintain the confidence of our customers who have all lived and continue to live a fairly anxyogenic period.

The implementation of more advanced hygiene solutions is now part of our daily life and will now be part of our life.

Here we offer a selection of the best European products and manufacturers of hydroalcoholic gel dispensing terminals to install in your hotels.

NEW GESTURES, NEW STANDARD

HYDROALCOHOLIC GEL DISPENSING TERMINALS

Hydro-alcoholic sanitizer dispensing terminals

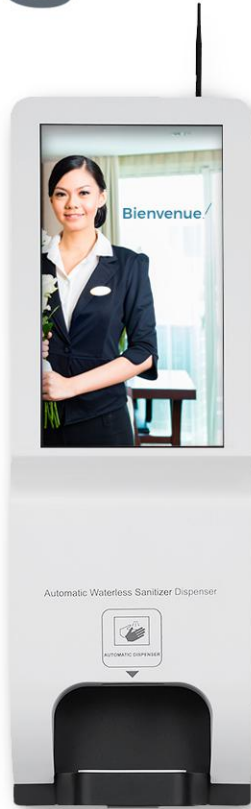

by EMISYS

Made in Belgium, the EMISYS dispensers are very elegant and offer a high level finish.

The hydro-alcoholic gel is also made in Belgium.

Available in 3 versions, on totem, wall and without screen, all the terminals dispense the gel doses automatically.

These terminals represent a perfect solution for the health security of your Guests and your collaborators.

Hydro-alcoholic sanitizer dispensing terminals

EMISYS
 PERSONALIZED "AT YOUR IMAGE"

As standard, EMISYS terminals are white for terminals with digital screen and black in the version without screen. These terminals are partially or fully customizable: Application of your logo or your overall graphic charter // Covering: Leather, Wood, Carbon, Gloss, Marble, Gold leaf, ... // Laser cutting & LED backlighting // LED strip // Total tailor-made project.

HD screens are multimedia and can accommodate all formats of images, videos, .. Basically, the easiest way to stream content is to plug a USB drive into the back of the monitor. The terminal will then broadcast, automatically and in a loop, the content (s) present on the key. In the event of a fleet, the terminals can be controlled by a dynamic display solution (CMS) allowing remote management of the different content to be broadcast.

This software for controlling your screens is included in each terminal and very easy to use!
